Note: **Under the provisions of this legislation it is the duty of each person who has control of the premises to ensure that cooling towers, evaporative condensers and any other notifiable device on the premises are registered in writing with the local authority. It is also the duty of those in control of the premises to notify any changes to the device or if that device is no longer in use.**

the local authority is required to keep a register of these notifications, most of these premises are likely to come under the enforcement of the Health and Safety Executive (HSE). The Local Authority will make available to HSE information from Notifications.
