SUSTAINABILITY ACTION PLAN 'ENERGY EFFICIENCY WORKS'

PURPOSE

1. To seek authority from the Executive on expenditure from the Capital Programme budget on Energy Efficiency Works in 2008/9.

RECOMMENDATION

2. To seek authority from the Executive to release £100,000 from the Council's capital programme for energy efficiency works.
3. The Executive to approve that these monies be spent on replacement of the old conventional boilers with high efficiency condensing boilers and other energy efficiency works as outline in the report.
4. The Head of Property Consultancy, in consultation with the Portfolio Holder for Resources, be authorised to tender the works in accordance with Standing Orders and accept the most advantageous tender for the works.

REASONS FOR RECOMMENDATION

5. These works will reduce energy consumption and carbon emissions inline with the Council's strategic objectives.

SUMMARY OF KEY POINTS

6. The renewal of old conventional boilers with high efficiency condensing boilers would effectively lower fuel costs and carbon emissions. High efficiency condensing boilers work on the principle of recovering and using heat which is normally wasted from the flue of a conventional boiler.
